

### Build a bug hotel.

Every animal on Earth has a special role to play in keeping our environment healthy—even the little critters! A bug hotel attracts insects and gives them a place to nest during colder months. Make one by filling a small wood box with dried grasses, bark, flowers and sticks.

### Go on a nature scavenger hunt.

Learn about local flora and fauna this Earth Day by searching for flowers, plants and trees in your garden/ local area. You could also wear a sticky tape or masking tape bracelet to collect anything you find on the ground on your way around.

### Build a bird house or bird feeder.

Build a birdhouse or bird feeder out of recycled materials, such as an old cardboard box, tins or milk bottle, to help out your local birds.

### Create a nature collage.

Celebrate by making an all-natural art collage with things you've found in nature, like leaves, pressed flowers, pieces of bark and other small items.

### You could also get really creative and...

- Write a letter to Earth saying what you will do to help Climate change.
- Make an acrostic poem.
- Make a list of family friendly ways to save on energy.
- Plant seeds and watch them grow over the next few weeks.
- Think of questions to ask if you could interview David Attenborough or Greta Thunberg.
- Make a video on how you can help the Earth with top tips!
