

DO ~~NOT~~ TRY THIS AT HOME

ISSUE #9

Featuring: **Marvin and Milo**

What you need: •an Alka-Seltzer tablet
•an empty film canister •an old newspaper •water

I can make a brilliant rocket!

Put the tablet in the film canister.

Add about 1 cm of water.

Put the lid on...

...lightly shake the canister.

Quickly place it upside down on the newspaper and stand back!

The Alka-Seltzer fizzes when in water, releasing gas.

This gas builds up in the canister until the pressure is too great, and the lid is forced off!
